# Science

### COVER

An aggressive storm that battered the coastal town of Blackpool, United Kingdom, in January 2007. Among other important changes now occurring in the marine environment, rising sea levels will create the need for increased protection from such severe storms. See the special section on our changing oceans beginning on page 1497.

### DEPARTMENTS

- 1449 This Week in *Science*
- 1455 Editors' Choice
- 1458 *Science* Staff
- 1461 Random Samples
- 1584 New Products
- 1585 *Science* Careers

- 1494 **Paring MiRNAs Through Pairing**  
A. E. Pasquinelli  
>> Research Article p. 1534; Report p. 1563
- 1495 **HDL miR-ed Down by SREBP Introns**  
M. S. Brown et al.  
>> Reports pp. 1566 and 1570

## BREVIA

- 1529 **Reassortment of Pandemic H1N1/2009 Influenza A Virus in Swine**  
D. Vijaykrishna et al.  
Surveillance of pigs is important for tracking reassortment and emergence of influenza A viruses.  
>> Science Podcast

## RESEARCH ARTICLES

- 1530 **Tropical Ocean Temperatures Over the Past 3.5 Million Years**  
I. D. Herbert et al.  
Tropical sea surface temperatures were controlled more by atmospheric connections to glaciation cycles than by ocean circulation.  
>> Perspective p. 1488; Report p. 1550
- 1534 **Target RNA-Directed Trimming and Tailing of Small Silencing RNAs**  
S. L. Ameres et al.  
Animal microRNAs have reduced complementarity to their targets to avoid their own degradation.  
>> Perspective p. 1494; Report p. 1563

## REPORTS

- 1540 **Bose-Einstein Condensation in Microgravity**  
I. van Zoest et al.  
Studies of atomic quantum states in free-fall conditions may provide ways to test predictions of general relativity.  
>> Perspective p. 1491
- 1543 **Hot-Electron Transfer from Semiconductor Nanocrystals**  
W. A. Tisdale et al.  
Extraction of highly excited electrons formed in a light-absorbing material may make solar cells more efficient.
- 1547 **Crossover from Single-Step Tunneling to Multistep Hopping for Molecular Triplet Energy Transfer**  
J. Vura-Weis et al.  
Ultrafast absorption spectroscopy reveals a change in mechanism when sites for electron transfer become more distant.

- 1550 **Subpolar Link to the Emergence of the Modern Equatorial Pacific Cold Tongue**  
A. Martinez-Garcia et al.  
The eastern Pacific Ocean cold tongue appeared as Earth's climate cooled and subpolar waters expanded in the Pleistocene.  
>> Perspective p. 1488; Research Article p. 1530

- 1554 **Radiocarbon-Based Chronology for Dynastic Egypt**  
C. Bronk Ramsey et al.  
Many radiocarbon dates from short-lived plant remains provide a long and accurate chronology for ancient Egypt.  
>> Perspective p. 1489

- 1558 **Evolutionary Novelty Is Concentrated at the Edge of Coral Species Distributions**  
A. F. Budd and J. M. Pandolfi  
Caribbean coral morphology documents that most coral evolution did not occur at the center of diversity of a species' range.

- 1561 **Identification of Germline Stem Cells in the Ovary of the Teleost Medaka**  
S. Nakamura et al.  
Ongoing follicle production is maintained by stem cells in an adult fish ovary.

- 1563 **Down-Regulation of a Host MicroRNA by a Herpesvirus *saimiri* Noncoding RNA**  
D. Cazalla et al.  
A viral noncoding RNA regulates the level of a complementary host-cell microRNA.  
>> Perspective p. 1494; Research Article p. 1534

- 1566 **MicroRNA-33 and the SREBP Host Genes Cooperate to Control Cholesterol Homeostasis**  
S. H. Najafi-Shoushtari et al.

- 1570 **MiR-33 Contributes to the Regulation of Cholesterol Homeostasis**  
K. J. Rayner et al.  
A small noncoding RNA helps regulate cholesterol levels in mice.  
>> Perspective p. 1495

- 1573 **Development of the Hippocampal Cognitive Map in Preweanling Rats**  
T. J. Wills et al.  
Some aspects of spatial cognition develop very early and may be determined innately.

- 1576 **Development of the Spatial Representation System in the Rat**  
R. F. Langston et al.  
Space and direction are already represented in specific neurons when rat pups navigate a location for the first time.  
>> Perspective p. 1487

## SCIENCEONLINE

## SCIENCEEXPRESS

[www.sciencexpres.org](http://www.sciencexpres.org)

**Biocatalytic Asymmetric Synthesis of Chiral Amines from Ketones Applied to Sitagliptin Manufacture**

C. K. Savile et al.

An engineered enzyme offers substantial efficiency advantages in the production-scale synthesis of a drug.

10.1126/science.1188934

**Probing the Superfluid-to-Mott-Insulator Transition at the Single-Atom Level**

W. S. Bakr et al.

Imaging of atoms that were optically trapped in lattice sites reveals local dynamics of a quantum phase transition.

10.1126/science.1192368

**A Septin Diffusion Barrier at the Base of the Primary Cilium Maintains Ciliary Membrane Protein Distribution**

Q. Hu et al.

Signaling proteins are retained in the cilium by a diffusion barrier created by a member of the septin family.

10.1126/science.1191054

**Sfrp5 Is an Anti-Inflammatory Adipokine That Modulates Metabolic Dysfunction in Obesity**

K. Ouchi et al.

Fat cells secrete an anti-inflammatory factor that has beneficial effects on metabolic health.

10.1126/science.1188280

**Integrative Modeling Defines the Nova Splicing-Regulatory Network and Its Combinatorial Controls**

C. Zhang et al.

Network modeling reveals an RNA splicing network in the brain and uncovers complex mechanisms of regulation.

10.1126/science.1191150

## TECHNICAL COMMENTS

**Comment on "Deep-Sea Temperature and Ice Volume Changes Across the Pliocene-Pleistocene Climate Transitions"**

J. Yu and W. S. Broecker

Full text at [www.sciencemag.org/cgi/content/full/328/5985/1480-c](http://www.sciencemag.org/cgi/content/full/328/5985/1480-c)

**Response to Comment on "Deep-Sea Temperature and Ice Volume Changes Across the Pliocene-Pleistocene Climate Transitions"**

S. Sasdian and Y. Rosenthal

Full text at [www.sciencemag.org/cgi/content/full/328/5985/1480-d](http://www.sciencemag.org/cgi/content/full/328/5985/1480-d)

## SCIENCENOW

[www.sciencenow.org](http://www.sciencenow.org)

**Highlights From Our Daily News Coverage**

**Was the New World Settled Twice?**

Analysis of ancient skulls suggests a wave of migration before the ancestors of today's Native Americans.

**Did a Deep Sea Once Cover Mars?**

River deltas suggest a large, ancient ocean, but not all experts are convinced.

**Better Rice Through Fungi**

A bit of fungal cultivation helps rice plants grow up to five times as fast.

## SCIENTESIGNALING

[www.sciencesignaling.org](http://www.sciencesignaling.org)

**The Signal Transduction Knowledge Environment**

**RESEARCH ARTICLE: Ablation of the Kinase NDR1 Predisposes Mice to the Development of T Cell Lymphoma**

H. Cornils et al.

The kinase NDR1 functions as a haploinsufficient tumor suppressor by ensuring proper apoptotic responses.

**PROTOCOL: Analysis of Matrix-Dependent Cell Migration with a Barrier Migration Assay**

S. Kroening and M. Goppelt-Strube

Removable plastic barriers allow quantification of cell migration without damaging either the surface proteins or the cells.

## FUNDING SOURCES

Find opportunities to fund research and training in cell signaling.

## GLOSSARY

Find out what ADPKD, CICR, and DHPR mean in the world of cell signaling.

## SCIENCECAREERS
